PROFESSIONAL EXPERIENCE

June 2013   Top Investment Company
to September 2014 Toronto, Ontario
(contract)   BA ANALYST

Designed and deployed a centralized Equities Trading Platform to handle both domestic and international trades that included trade execution, trade allocation, report generation, commission management and settlement of trades.

- Interacted with multiple stakeholders to get a better understanding of client business processes and gather business requirements
- Coordinated the efforts of the System Architects and Quality Assurance Analysts
- Developed BRD by analyzing and prioritizing the requirements
- Identified Use Cases from the requirements and developed Use Cases
- Created business process workflow diagrams as Activity diagram within Rational Rose.
- Created Use-Cases and Business Use-Case Model after accessing the status and scope of the project and understanding the business processes
- Managed all the requirements in RequisitePro, making requirements available to all team members.
- Tracked changes to multiple artifacts by versioning artifacts, associating requirements to specific change request/defects to streamline the defect/change tracking process
- Performed Feasibility Analysis and Risk Analysis on vendor/third party tools
- Assured that all Artifacts are in compliance with corporate SDLC Policies and guidelines
- Coordinated and prioritized outstanding defects and enhancement/system requests based on business requirements, allowing sufficient time frame to ensure accuracy and consider deadlines
